Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 11-15 and 19 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 14, 2004.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 16-18, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Onishi et al (#6,196,629).

Onishi et al show a child car seat (1A) comprising a base and a seat main body supported by the base. The base has a lower base portion (1C) and an upper base portion (16) that can be rotated with respect to the lower base portion.

Art Unit: 3636

With claim 2, the seat main body is mounted on the upper base portion via a reclining mechanism.

With claims 3 and 17, a shell of the seat main body and the upper base portion are connected via the reclining mechanism. The base is provided with a bridge. A belt fixing apparatus is mounted to the bridge.

With claim 4, the upper base portion is provided with a belt mounting portion.

With claim 5, the belt mounting portion is provided with a belt fixing apparatus.

With claim 6, a center of line of rotation of the upper base portion with respect to the lower base portion is inclined to be displaced to a front side in the longitudinal direction.

With claim 7, the lower base portion is formed in a shape, wherein the thickness is gradually increased from a front end in the longitudinal direction toward a rear.

With claim 9, armrest portions are provided on both sides of a seat portion in the shell.

With claim 10, the armrest portion of the shell is provided with a belt through hole.

With claim 18, a recess portion is provided in the front surface side of the shell, and the bridge and the belt fixing apparatus are received in the recess portion.

With claim 20, the belt fixing apparatus is arranged in a center with respect to the lateral direction.

Conclusion

Art Unit: 3636

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Young'392, Vezinet et al, Nania, Janisch, Young'629, and Young'364 are cited as showing similar types of child seat.
